

LIFE PHARM®

Cellnergy FootCharge

**STEP INTO THE FUTURE OF
REGENERATION**

Your Nervous System

THE CONTROL CENTER OF REGENERATION

Your nervous system is your body's internal communication network. It sends and receives signals that control movement, sensation, balance, and recovery.

But with age, that signal weakens and the effects show up in everyday life:

- Balance and coordination decline
- Reduced circulation
- Numbness, tingling, and fatigue increase
- Slow recovery from muscle fatigue
- Sleep becomes less restorative

And the first place most people feel it? **Their feet.**

What If the **Secret to Wellness** Lies at Your Feet?

Your feet aren't just for walking, they're your body's neurological foundation.

With over 7,000 nerve endings and reflex zones connecting to your organs, joints, and muscles, your feet are a gateway to full-body health. They rely on clear, responsive signals from your nervous system to function properly.

That's why many signs of aging start at the feet and why recharging your nervous system from the ground up can help restore how your entire body moves, rests, and repair

INTRODUCING

Cellnergy FootCharge

At LifePharm, we're redefining what wellness means—by focusing on what truly matters: regeneration.

As The Regeneration Company, we create solutions that support the body's ability to repair, restore, and thrive at every level.

Cellnergy FootCharge is a revolutionary wellness device that is designed to support the nervous system, circulation, and cellular energy—starting from the ground up.

3 Technologies. 1 Powerful Regeneration System.

Cellnergy FootCharge is powered by three advanced wellness technologies to activate your body's natural regenerative processes.

Cellwave™ BioActivation (CWB)

Awakens nerve activity
and neuromuscular
communication*

Terahertz Resonance (~1 THz)

Reactivates cellular energy
at the frequency of
optimal health*

Infrared Thermotherapy (38–45°C/100–113°F)

Penetrates deep into tissues
to stimulate blood flow and
regenerative activity*

Together, they help your body reconnect, recover, and step confidently into a healthier, more energized future.

*This product is used for self-education and research purposes to support general wellbeing. It is not intended to treat disease or to prevent impairment of human health. When used according to directions, it does not present any potential risk of illness or injury. If you have any medical concerns or conditions, please consult with a physician before use.

CellWave™ Bioactivation

REAWAKENING YOUR NERVE PATHWAYS

Unlike traditional EMS devices that use generic electrical pulses, CellWave™ Bioactivation mimics the same wave patterns your brain naturally sends through your body. Delivers natural, effective stimulation to reactivate dormant nerve cells and support regeneration.

- Activate sensory and motor nerve pathways*
- Strengthen communication between nerves and muscles*
- Supports better balance and nervous system function*
- Boost circulation and lymphatic flow in the lower body*

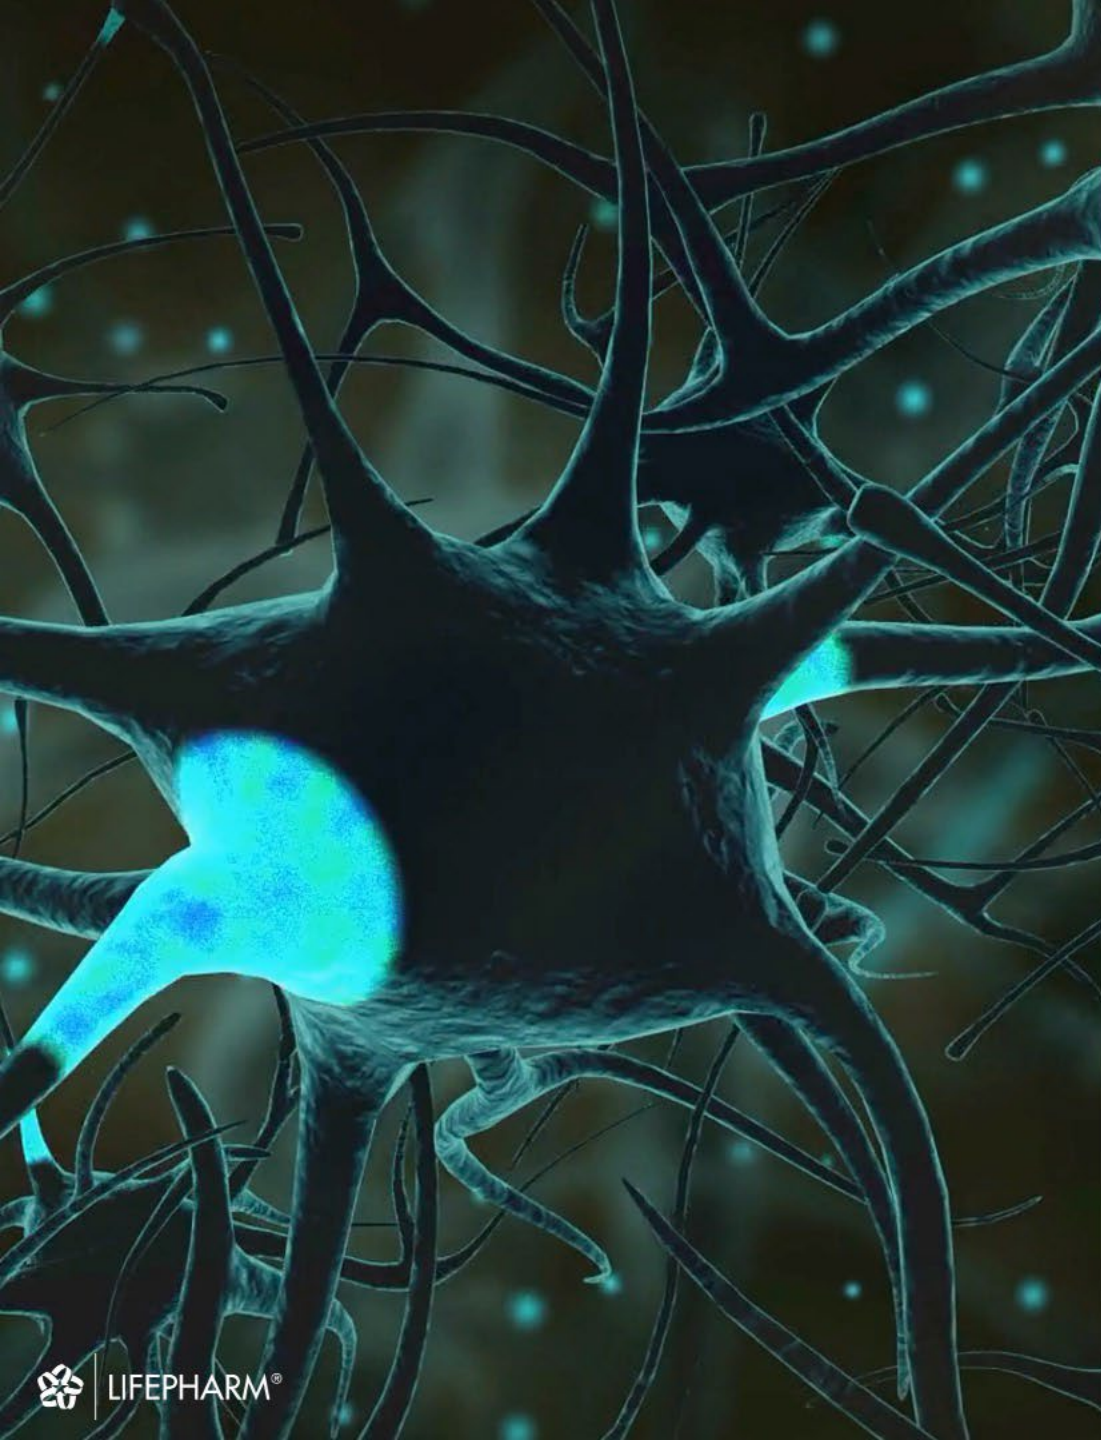

Studies have shown that low-frequency electrical stimulation can increase nerve conduction speed and muscle activation in people experiencing nerve fatigue and neuropathy.

Journal of Clinical Neurophysiology, 2018

*This product is used for self-education and research purposes to support general wellbeing. It is not intended to treat disease or to prevent impairment of human health. When used according to directions, it does not present any potential risk of illness or injury. If you have any medical concerns or conditions, please consult with a physician before use.

LIFE PHARM®

Terahertz Resonance

CELLULAR ENERGY, RECHARGED

Operating at ~1 THz, Terahertz resonance helps “remind” your cells how to function at their optimal frequency by harmonizing your body’s natural electromagnetic rhythm. This supports bioelectrical coherence, cellular homeostasis, and regeneration

This powerful bio-resonance effect helps:

- Restore communication between cells*
- Improve energy balance and vitality*
- Support overall cellular repair and function*

Scientific research shows that terahertz waves can influence the way water molecules and proteins behave inside cells—key factors in cell signaling and repair.

Biophysical Journal, 2020

*This product is used for self-education and research purposes to support general wellbeing. It is not intended to treat disease or to prevent impairment of human health. When used according to directions, it does not present any potential risk of illness or injury. If you have any medical concerns or conditions, please consult with a physician before use.

Infrared Thermotherapy

DEEP RELIEF, LASTING CIRCULATION

Delivering soothing, controlled heat between 38–45°C (100–113°F), Infrared Thermotherapy penetrates deep into muscle and connective tissues to enhance circulation. As circulation improves, nutrients and energy flow more efficiently, fueling cellular repair and supporting nervous system recovery from the inside out.

This gentle heat therapy helps:

- Boost blood flow and oxygenation*
- Accelerate detoxification*
- Reduce tension and discomfort*

Clinical research has shown that infrared thermotherapy can boost microcirculation by up to 80%.

Journal of Photomedicine and Laser Surgery, 2017

*This product is used for self-education and research purposes to support general wellbeing. It is not intended to treat disease or to prevent impairment of human health. When used according to directions, it does not present any potential risk of illness or injury. If you have any medical concerns or conditions, please consult with a physician before use.

LIFE PHARM®

6 Targeted Modes. One Goal: Wellness.

Customize your wellness routine based on how you want to feel. Cellnergy FootCharge gives you full control with 6 specialized modes, 10 intensity levels, and 2 heat settings—designed to support nerve function, circulation, and daily recovery.

EACH MODE TARGETS A SPECIFIC BENEFIT:

Mode 1: Relax

Supports deeper sleep and relieves nerve fatigue*

Mode 2: Knead

Boosts circulation and eases joint/muscle tension*

Mode 3: Tap

Improves balance, coordination, and reaction speed*

Mode 4: Squeeze

Enhances brain-body communication for clarity and focus*

Mode 5: Pulse

Eases numbness, tingling, and neuropathy-related symptoms*

Mode 6: Strength

Supports muscle tone and helps prevent atrophy*

Mode 1: Relax

Use When:

You feel mentally overstimulated or physically restless—especially before bed.

Why It Helps:

This mode calms the nervous system and promotes relaxation, helping the body enter a more restful state for recovery and sleep.

*This product is used for self-education and research purposes to support general wellbeing. It is not intended to treat disease or to prevent impairment of human health. When used according to directions, it does not present any potential risk of illness or injury. If you have any medical concerns or conditions, please consult with a physician before use.

Mode 2: Knead

Use When:

You experience tightness in the calves, feet, or lower legs after standing or walking.

Why It Helps:

Like a deep-tissue massage, this mode targets stiffness and tightness in the feet and calves, helping to release built-up pressure and restore mobility—great after long days or uncomfortable shoes.*

*This product is used for self-education and research purposes to support general wellbeing. It is not intended to treat disease or to prevent impairment of human health. When used according to directions, it does not present any potential risk of illness or injury. If you have any medical concerns or conditions, please consult with a physician before use.

Mode 3: Tap

Use When:

You notice sluggish movements, slower reflexes, or minor missteps in daily activity.

Why It Helps:

Tap mode gently stimulates reflex zones with rhythmic pulses to reawaken sensation and nerve activity—perfect for anyone noticing less feeling in their feet or looking to support better foot-to-brain signaling.

*This product is used for self-education and research purposes to support general wellbeing. It is not intended to treat disease or to prevent impairment of human health. When used according to directions, it does not present any potential risk of illness or injury. If you have any medical concerns or conditions, please consult with a physician before use.

Mode 4: Squeeze

Use When:

You feel foggy or disconnected from your body.

Why It Helps:

This mode supports proprioceptive feedback and brain-body signaling—critical for alertness, motor control, and mental clarity.

*This product is used for self-education and research purposes to support general wellbeing. It is not intended to treat disease or to prevent impairment of human health. When used according to directions, it does not present any potential risk of illness or injury. If you have any medical concerns or conditions, please consult with a physician before use.

Mode 5: **Pulse**

Use When:

You notice reduced sensation in your feet or a “pins and needles” feeling.

Why It Helps:

Gentle pulses stimulate dormant nerve pathways and improve microcirculation to help restore sensation and comfort.

*This product is used for self-education and research purposes to support general wellbeing. It is not intended to treat disease or to prevent impairment of human health. When used according to directions, it does not present any potential risk of illness or injury. If you have any medical concerns or conditions, please consult with a physician before use.

Mode 6: Strength

Use When:

You feel weakness in the feet or notice changes in how you stand or walk.

Why It Helps:

This mode activates small foot muscles that contribute to stability and strength—especially helpful for long-term mobility and fall prevention.

*This product is used for self-education and research purposes to support general wellbeing. It is not intended to treat disease or to prevent impairment of human health. When used according to directions, it does not present any potential risk of illness or injury. If you have any medical concerns or conditions, please consult with a physician before use.

Experience Targeted Relief and Holistic Regeneration

- Eases numbness, tingling, and neuropathy symptoms to restore comfort and ease*
- Supports balance and coordination for safer, more confident movement*
- Boosts nerve sensitivity and strengthens communication between brain and body for improved responsiveness*
- Accelerates reaction time, supporting agility and confident mobility*
- Promotes deeper, more restorative sleep and reduces nerve-related fatigue for renewed energy*

3 Phases of Regeneration Response

REGENERATION ISN'T INSTANT—IT'S A PROCESS.

With consistent daily use, Cellnergy FootCharge activates your nervous system and cellular repair mechanisms in three natural phases.

WITHIN 1-30 MINUTES **Immediate Regeneration Response**

Awakes tired nerves, easing tension, and sparking your body's regenerative response. Feel deep relief and relaxation within minutes.*

WITHIN 1-3 DAYS **Regenerative Reset**

Continued use helps reactivate nerve pathways and improve microcirculation to relieve numbness, restore muscle tone, and strengthen brain-body communication.*

4 WEEKS & BEYOND **Long-term Regeneration in Action**

With consistent daily usage, you strengthen communication between the brain and body, promoting healthier nerve signaling, circulation, and mobility over time.*

Just 10 Minutes a Day for Daily Regeneration

Using Cellnergy FootCharge is simple, effortless, and fits right into your daily routine.

1. Sit comfortably and place your bare feet on the pad
2. Select your preferred mode and intensity level
3. Choose your heat setting (Low or High)
4. Relax for 10–20 minutes, once or twice daily

PRO TIP

Start with “Relax,” finish with “Knead” or “Strength.”
Use before bed for better sleep.

Certifications & Quality Standards

- **Patent-Pending Technology**
Uniquely designed to promote regeneration through nerve stimulation.
- **CE & UL Certified**
Complies with safety standards in Europe and North America.
- **ISO 9001 & 14001**
Certified for quality control and eco-conscious manufacturing.
- **9S Methodology**
Evaluated for effectiveness, safety, and user experience
- **Recognized by the American Society on Aging**
Aligned with standards for aging wellness.

Cellnergy FootCharge vs. Other Devices

Other devices target symptoms. Cellnergy FootCharge targets the system.

Feature/Function	Clinical EMF/TENS Devices	PEMF Foot Devices	Heated Foot Massagers	Cellnergy FootCharge
Regeneration Focused	 Symptom relief only	 General activation only	 Comfort-focused only	 Targets nerve, circulation, and cellular regeneration
Targets Nervous System	 	 	 	
Supports Circulation	 Limited	 Indirect	 None	 Direct stimulation
Improves Cellular Energy	 	 	 	 Strong Bioactivation
Multi-Technology Approach	 Single technology	 PEMF only	 Basic heat/vibration	 3-in-1: Bioactivation, Terahertz, Infrared
Customizable Settings	 Requires technician	 Few options	 Heat levels only	 Different modes, heat and intensity
At-Home Convenience	 Appointments needed	 	 	 Simple daily use

The Power of **Regenerative Synergy**

When used together, these four LifePharm products form a powerful, synergistic system—each enhancing the effects of the next for deeper, longer-lasting regeneration.

LAMININE

Activates the body's natural regeneration process and helps extend cellular longevity*

Cellnergy FootCharge

Awakens nerve activity and circulation, kickstarting the body's healing response*

Cellnergy Wellness

Delivers focused regeneration using terahertz and negative ions to support tissue communication*

Cellnergy Power Cream

Relieves joint discomfort by reactivating dormant repair cells.**
